## **Amendment to the Claims**

This listing of claims will replace all prior versions of the claims in this application.

1. (previously presented) In a vinyl acetate based polymer emulsion formed by the emulsion polymerization of vinyl acetate and N-methylolacrylamide, optionally other monomers, in the presence of a stabilizing system and a redox catalyst system comprised of an oxidizing agent and a reducing agent, the improvement for reducing formaldehyde emissions in the resulting vinyl acetate based polymer emulsion, which comprises:

forming said vinyl acetate based polymer emulsion utilizing as the reducing component of the redox catalyst system a reducing agent of the formula:

$$MO \xrightarrow{S} \begin{array}{c} R_1 \\ R_2 \end{array}$$

where M is a hydrogen atom, an ammonium atom or a monovalent metal ion,  $R_1$  is OH or  $NR_4R_5$  wherein  $R_4$  and  $R_5$  each are H or  $C_1$ - $C_6$  alkyl;  $R_2$  is H or an alkyl, alkenyl, cycloalkyl or aryl and  $R_3$  is  $CO_2M$ .

- 2. (**currently amended**) The vinyl acetate based polymer emulsion of Claim 1 in which the vinyl acetate based polymer comprises <u>polymerized units of</u> ethylene in an amount of from about 10 to 40% by weight of the polymer.
- 3. (previously presented) The vinyl acetate based polymer emulsion of Claim 2 wherein the N-methylolacrylamide is present in an amount of from about 0.5 to 10% by weight of the polymer.
- 4. (previously presented) The vinyl acetate based polymer emulsion of Claim 3 wherein the reducing agent represented by the formula is selected from the group consisting of: 2-hydroxyphenyl hydroxymethyl sulfinic acid-sodium salt; 4-methoxyphenyl hydroxymethyl sulfinic acid-sodium salt; 2-hydroxy-2-sulfinato acetic acid-disodium salt;

D

2-hydroxy-2-sulfinato acetic acid-zinc salt; 2-hydroxy-2-sulfinato propionate-disodium salt; ethyl 2-hydroxy-2-sulfinato propionate-sodium salt.

- 5. (currently amended) The vinyl acetate based polymer emulsion of Claim [4] 3 wherein the vinyl acetate based polymer emulsion is formed using a redox catalyst system of hydrophobic hydroperoxide and the glycolic acid adduct of sodium sulfite.
- 6. (previously presented) The vinyl acetate based polymer emulsion of Claim 3 wherein M is sodium or zinc.
- 7. (previously presented) The vinyl acetate based polymer emulsion of Claim 3 wherein  $R_1$  is OH.
